I want a code to extract the magazines from a website and collect it in a pdf file.
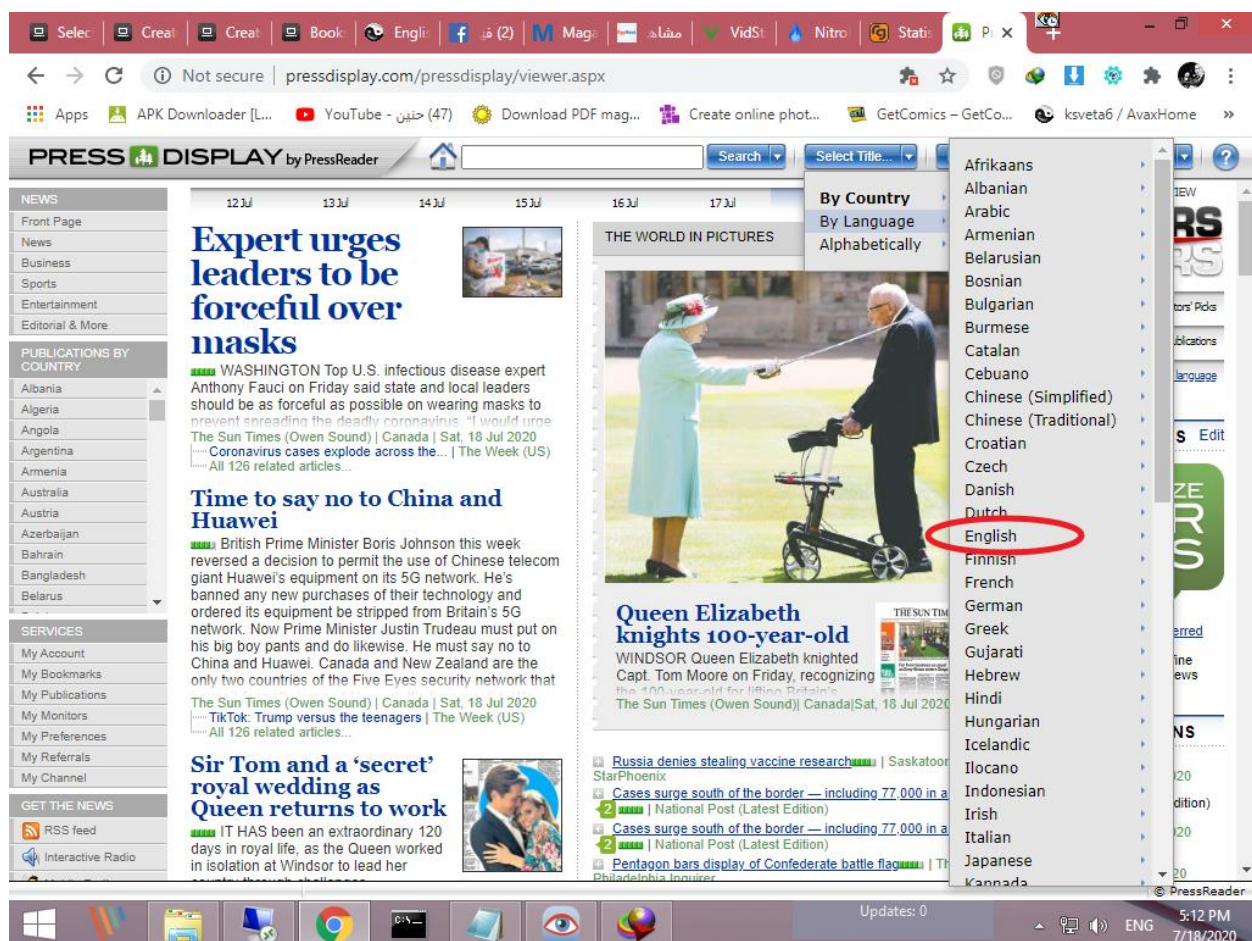

First thing the website is related to magazines

These two websites are linked together, and you sign in to both of them using just one account

The link of It is:
http://www.pressdisplay.com/pressdisplay/viewer.aspx?fbclid=IwAR2XGoBvP0ySNhYvjwHdeCK4NSZYDlktCxgCM7wmb60Y3BZjx-nqHtEBBFk

https://www.pressreader.com/catalog

Choose the English to make magazines appear.

The magazines on the website are constructed by two files one file is SGV for text, the other one is JPG

These files combined together to make the magazine

You can use this account
